

Care Across the Life Cycle
Maternal-Child Clinical Encounter Checklist

Instructions: This must be completed during your CALC Block Rotation. Please use this as your checklist, and have a staff member/associate staff/house staff sign off that you completed each task. Once your list is completed, email to medicalstudents@gundersenhealth.org with the subject "Maternal/Child Checklist."

	Clinical Encounter	Date	Signature
	Observe/Participate in a birth		
	Observe neonatal resuscitation		
	Observe discharge education for mother/baby		
	Observe newborn procedures: administration of Vitamin K, Hepatitis B vaccine and need for HBIG, eye care		
	Observe newborn hearing screen		
	Observe male infant circumcision		
	Observe infant congenital heart disease (oximetry) screen		
	Observe lactation consult		
	Observe social work involvement with dyad		
	Observe options for maternal analgesia		
	Observe management of maternal postpartum hemoglobin and options if low (including hematology consult/iron infusions)		
	Observe contraception counseling in postpartum setting		
	Observe depression screening and tools used		
	Observe maternal counseling for future pregnancies-- spacing them out, what to do prior (glucose control in diabetic, folic acid), what to do during pregnancies— previous preterm labor, cervical scans, 17-OHP
